Samarbeidsavtaler internasjonalt:

- * NOAA - National marine fisheries service, USA
- * Alaska Fisheries Science Centre, Seattle
- * North East Fisheries Science Centre, Woods Hole
- * National research council of Canada
- * PINRO - Murmansk, Russland
- * Utstrakt prosjektsamarbeid med afrikanske land gjennom Nansenprogrammet
- * POGO - Partnership of Global Ocean Observation

Vi samarbeider også med:

MRI, Island

DFHU, Danmark

MARLAB, Skottland

IFREMER, Frankrike

FAO

Vi deltar i:

ICES, OSPAR, NAFO, NEAFC, NASCO,

NAMMCO, IWC, CCAMLR, Nordisk ministerråd,

EUs forskningsprogram

Sampublisering med utenlandske institusjoner:

90 av 175 referee-publikasjoner sammen med forskere fra andre land

(Tall fra årsrapport til Fiskeridepartementet per 1. september 2003)

I tillegg:

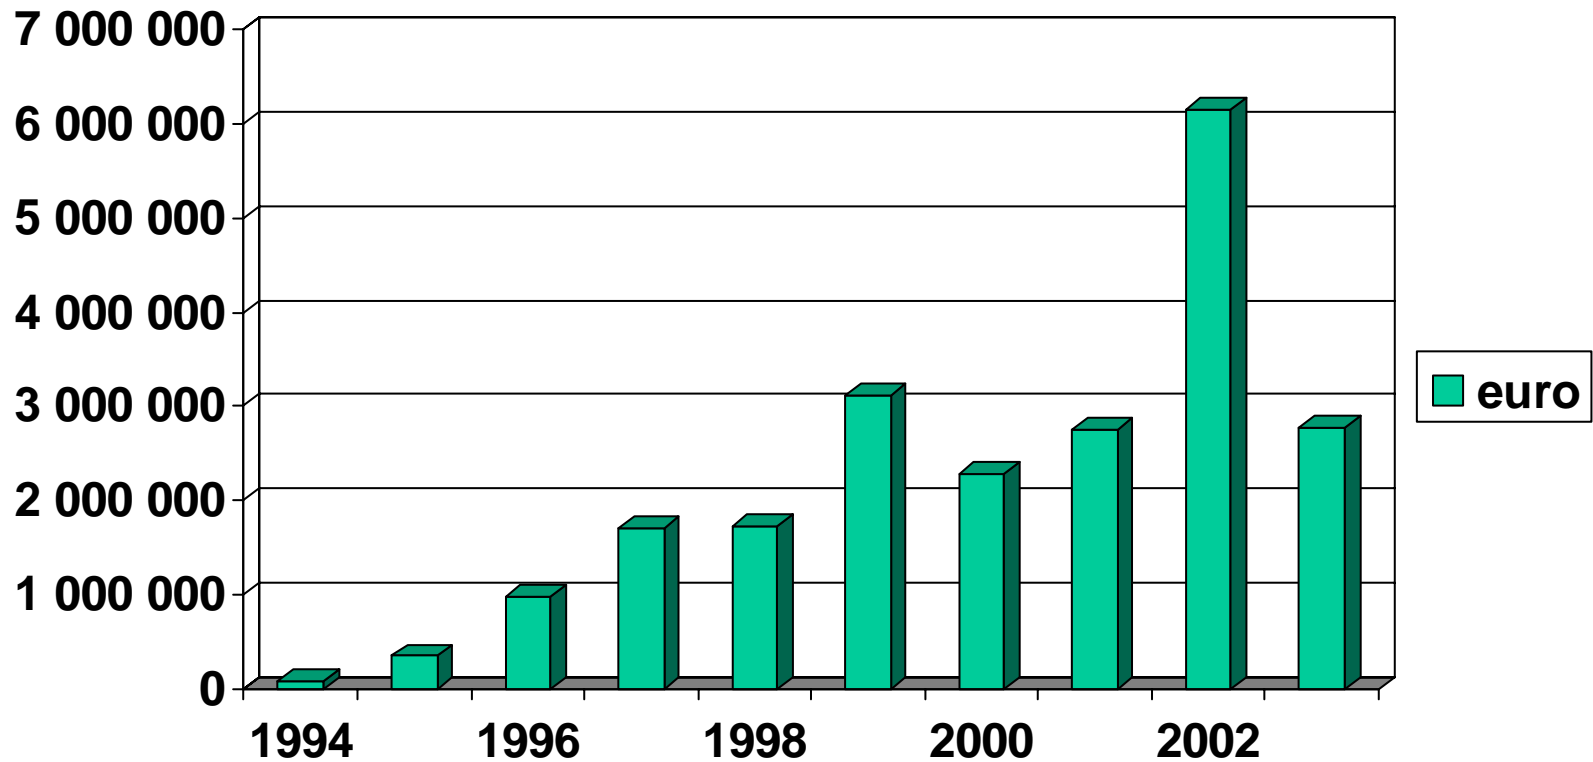

EU-prosjekt

Samarbeidsprosjekt med PINRO

Nordiske samarbeidsprosjekt

22 land representert i arbeidsstokken på instituttet

HIs EU - portefølje

Marine science in EU FP's

- FP 5 (1998 - 2001): 1083 m.€
- FP 6 (2002 - 2005): 700 m.€
- A reduction of 35 %, Reverse this trend for FP7

The Oceans – knowledge is opportunity

- Understanding: Increase the basis knowledge about the oceans
- Technology: To explore the oceans and to keep surveillance
- Management of the resources: Increase knowledge as basis for sustainable use of the marine resources
- Exploitation: Knowledge to support new industry, products and services
- Regional development: Knowledge to understand and coordinate sound coastal area development

The Ocean

and future aspects of the European Marine Research Area

International Forum Meeting

Friday 11 June: 09:00 – Lunch
Stanhope Hotel, Rue du Commerce 9, 1000 Brussels

The Forum-meeting focuses on why the Ocean and future aspects of the European Marine Research Area should be high on the European research and innovation agenda and in the future 7th Framework Programme.

Purpose

A main purpose of the seminar is to stimulate the debate on the priority of this theme and which issues that should be addressed on a European level. What is the potential value added for Europe? Which opportunities could be grasped? What could be the elements for a research agenda? What are the challenges regarding innovation and value creation? What opportunities could the new EU research policies offer?

Concept

First, setting the scene, Commissioner for Research Mr. Philippe Busquin and the Norwegian Minister for Education and Research Mrs. Kristin Clemet will give keynotes highlighting the new European research policies, European and national challenges and relate these broad issues to the marine scene, followed by keynotes creating a platform for an intense exchange of views on what could be the future priorities. Addressing issues for follow up, key actors will conclude the event. A seated lunch together with an informal reception will offer rich opportunities for networking.

Participation is based on invitation only. There will be no participation fee.

Reception

Thursday evening 10 June Ambassador Bjørn T. Grydeland invites all participants to an informal reception 19:30 – 21:30 where the Sea will be the theme. The reception will take place in his residence: Av. Jules César 24, 1150 Bruxelles.

Bergen: Profiled in TIME magazine in August as an international center for marine science
